Hey Siri
by James Strazza
@jslyrical

hey Siri turn the lights off
and do me a favor
order me a nitrogen tank
and cough syrup with no flavor
don't forget the bags
and the O2 regulator
i still need the gas but i'll figure that out later.

then go on the shady sites
for cyanide or Nembutal
maybe sodium nitrite
fuck it, get it all.

i'll tell you what, Siri
they wouldn't do a dog like this
they'd have put him down months ago
that lucky little shit
one trip
one shot
two tears
and some ash
i'm worth less than a mutt
who can no longer play catch.

it breaks my heart to know
that it'd make my mother weep
but knowing she'd be freed
from my burden gives me peace
she deserves a better life
away from my disease
so maybe in some time
i should count my final sheep.

hey Siri, goodnight.

James Strazza is a musician at heart and he created this album *candid* before progressing to severe ME.
